Custom home 5,000 to 7,000 square feet

Speculative Traditional Home: Builder: Patrick K. Keating & Co., Inc.

Garnering two gold awards as well as two silvers and a bronze, Studio Z's projects were once again recognized this year for high-quality design and construction.

The Custom Home between 5,000 and 7,000 square feet winner is recognized for being a house that maximizes views as well as creates spaces perfect for both privacy and entertaining. The large home is sited on a former working farm to incorporate views of the surrounding mountains and countryside. The central family room and large kitchen facilitate entertaining, while a master suite wing creates a cozy retreat for two.

Winning in the Speculative Traditional Home category, an Arts-and-Crafts style home features such distinguishing architectural elements as lowered rooflines and natural materials that tie the house into its surrounding environment. Inside, a bright and open floor plan, details like coffered ceilings, a large master suite, and a common family area combine to create a balance of form and function.
